Mount Diablo Bird Alliance

The Quail

Volume 71, Number 4

May 2026

May Monthly Program Meeting: Thursday, May 7, 7 PM

Mount Diablo Bird Alliance will meet Thursday, May 7 in the Camellia Room at the Gardens at Heather Farm, 1540 Marchbanks Drive, Walnut Creek, CA 94598.

Address:

The Camellia Room @ The Gardens at Heather Farm
1540 Marchbanks Drive, Walnut Creek, CA 94598

Please note that MDBA no longer provides disposable cups at our meetings.

If you would like to enjoy water, punch, or tea, please bring your own cup.

We will have a few reusable cups available if you need one. We appreciate your cooperation.

May Agenda:

6:30 PM Doors Open

7:00 PM *Bobcat Film preview*

7:15 PM Announcements

7:30 PM Refreshments and Raffle

7:45 PM Main Program: *Total Uruguay*

Our Raffle table's success relies heavily on your fantastic donations! We're on the lookout for awesome bird-related items or anything similar, like books, art, collectables, feeders, bird boxes, and camera equipment. Basically, anything you think someone might be interested in buying raffle tickets for. Your generosity is greatly appreciated!

If you have such items but are unable to attend meetings, please contact info@mtdiablobirds.org and we will try and arrange a pickup from local addresses.

Total Uruguay with Viviana Wolinsky

Viviana Wolinsky and Steve Hunter

Photos by S. Hunter

Photos by Vishal Subramanyan

Our meeting will begin with a short preview of an upcoming film about bobcats. Vishal Subramanyan is a National Geographic Young Explorer and Osher Fellow at the California Academy of Sciences. For nearly a decade, he's been observing the life of an urban bobcat living along the Diablo Range, and is now producing a long-term documentary film that follows this animal's story. In this short pre-program presentation, Vishal will share a teaser from the film and behind-the-scenes footage from years of fieldwork, highlighting what bobcats can teach us about coexistence in the East Bay Area. He'll also touch on habitat connectivity and the ripple effects of rodenticides on local wildlife, and share what's ahead for completing the film.

Viviana Wolinsky and Steve Hunter began birding within the last decade, merging this new passion with their love of travel. Steve focuses on bird photography and provided all the images for this presentation. Viviana maintains a life list of over **3,000 species**, more than half of which she observed in South America. She has visited Uruguay twice for birding—most recently on the Golden Gate Birding Alliance's (GGBA) "Total Uruguay" trip—and currently holds the **number 121 spot** on the eBird lifetime list for the country.

Both are active GGBA volunteers. Viviana serves as an assistant instructor for Steve's intermediate birding and sparrow classes. Together, they have led numerous local field trips and a special Birdathon trip to Colorado. Viviana also serves as the co-compiler for the Oakland Christmas Bird Count.

This presentation offers a preview of what to expect on a birding trip to Uruguay, such as the GGBA's upcoming **2027 expedition**. While the country is roughly the size of Washington state with a climate similar to California's, it boasts a wide range of habitats, including:

- **The Pampas** (grasslands)
- **Atlantic Forest**
- **Savannas**
- **Wetlands**
- **Palm Tree Forests**

This ecological diversity allows for a great variety of bird species to be seen easily across short distances. Furthermore, Uruguay serves as a vital feeding and breeding destination for many migratory species.

Election of MDBA Officers: Vote in May

Rochelle Fortier and Alan Bade, *MDBA Nomination Committee*

The annual election of officers for the Mount Diablo Bird Alliance Board of Directors is coming soon!

On **Thursday, May 7**, all current members will receive an email with "Ballot" or "Election" in the subject line. A link to the electronic ballot will be included in the body of that email. Please cast your vote by **Saturday, May 16**. Results will be announced in the June issue of *The Quail* and at our June program meeting.

Three of our current officers are standing for re-election. These officers will serve a one-year term from **July 2026 through June 2027**:

- **Vice President:** Ariana Rickard
- **Treasurer:** Steve Buffi
- **Secretary:** Karin Deas

Nominations for the ballot are now closed. Please note that the President position is not on the ballot this year, as no nominations were received.

Please vote promptly; your participation is greatly appreciated and vital to our chapter!

President's Letter

Rochelle Fortier, *MDBA Membership Chair*

Jerry Britten is no longer the President of the Mount Diablo Bird Alliance as he's now settled in his new Arizona territory. The board's decided to rotate presidential duties, so you'll hear from a different board member in each issue of **The Quail!**

My backyard is one of my favorite places to watch birds, especially when the Bottlebrush bush is in full bloom. Its red flowers attract multiple Anna's Hummingbirds. During the March heatwave, while I had a sprinkler watering the lawn, I saw three hummingbirds darting in and out of the streams, capturing water droplets! While the Bottlebrush is not a California native, it provides essential food and shelter for many birds. However, I am looking forward to planting more natives to create an even better habitat.

There is a wonderful opportunity to explore gardens featuring California native plants during the **Bringing Back the Natives** garden tours on **Saturday, May 2, or Sunday, May 3**. These private gardens showcase beautiful native plants that provide vital habitats for birds, insects, and other wildlife.

Five gardens in central Contra Costa belong to Mount Diablo Bird Alliance members:

- **Glenn Phillips** in Lafayette
- **Nancy Salsig** in Martinez
- **Pat Pomidor** in Orinda
- **Jim Ulrich** in Orinda
- **Lainie Johnson** in Walnut Creek

Please register online at the **Bringing Back the Natives** website. The tours are free, though donations are encouraged to help offset the costs of organizing these wonderful events.

As Membership Chair, I want to extend a sincere thank you to our members who volunteer for Christmas Bird Counts, build and install nest boxes, provide snacks for our meetings, lead field trips, participate in outreach events, and handle many other behind-the-scenes tasks. Our members are the key to helping our chapter achieve its goals.

New Members

Rochelle Fortier, *MDBA Membership Chair*

I would like to give a warm welcome to the new members who joined in March: **Bruce Aizawa**, Brentwood; **Jen Norris**, San Francisco; **Justin Rhinesmith** and **Kayla Kahl**, Walnut Creek; **Jane Takahashi**, San Ramon; **Valerie Waltjen**, Walnut Creek; and **Zari Weiss**, Pleasant Hill. I hope to see you at our next program meeting!

Bay Birding Challenge 2026: Support our Devil Mountain Quail!

The **Bay Birding Challenge** is a friendly annual competition organized by our neighbors at the **Golden Gate Bird Alliance** to raise awareness and funds for bird conservation, habitat protection, and advocacy.

This year's event takes place on **Saturday, April 25**, when teams from Audubon chapters across the region will compete to see who can identify the most species in a single day while birding across all nine Bay Area counties.

Last year, the Mount Diablo Bird Alliance team—the **Devil Mountain Quail**—placed 3rd, identifying an impressive **135 species**. This year, we aim to soar even higher!

Please click this **link** to learn more and consider backing MDBA's efforts. We welcome your monetary pledges and appreciate your enthusiastic support as we take to the field!

Do You Love to Sew? Our Bird Banders Need Your Help!

One of the conservation projects sponsored by the Mount Diablo Bird Alliance is the Mount Diablo Bird Observatory/Galindo Creek Songbird Banding Station in Concord. Their team performs vital work monitoring both resident and migratory birds in our region. To ensure the safety of the birds during handling, the station utilizes specialized "bird bags"—and they are currently in need of more!

A Note from Project Leader Hallie Daly:

"We are looking to acquire 200–300 additional bird bags, which we will also share with the Northern Saw-whet Owl station. Ideally, these should be made from breathable fabric, such as cotton sheets. The most important requirement is that the **seams must be on the outside of the bag**. Additionally, please avoid using plastic cinchers on the drawstrings, as they tend to break easily in the wash."

If you enjoy sewing and have old cotton sheets available, you can find assembly instructions here: **[Bird Bag Sewing Instructions \(PDF\)](#)**

Submission Details:

- **In-Person:** Drop off finished bags at the Membership Table during one of our monthly meetings.
- **Via Email:** If you cannot attend a meeting but would like to contribute, please reach out to us at info@mtdiablobirds.org.

Bringing Back the Natives Garden and Green Home Features Showcase

May 2 - 3

Registration for the free **22nd Annual Bringing Back the Natives Garden Tour and Green Home Features Showcase** is now open. This year features two full days of in-person inspiration! In addition to stunning landscapes, the tour will showcase homes equipped with innovative "green" features.

In-Person Tour Details The award-winning tour and showcase allows registrants to visit **70 beautiful, water-conserving native plant gardens** on **Saturday, May 2, and Sunday, May 3, from 10:00 AM to 5:00 PM**. While every home features a native plant garden, 30 locations will also showcase green home technology, including solar panels and batteries, induction ranges, heat pumps, and more.

Participants will learn how to:

- **Design** a native plant garden for year-round color and interest.
- **Create** habitats that support local wildlife.
- **Lower** water bills and garden without the use of pesticides.
- **Electrify** their homes to protect the environment and family health.

Why California Native Plants? Native plants are perfectly adapted to our local soil and climate, making them naturally water-conserving and easy to maintain. They are far more effective than non-native species at attracting indigenous birds, butterflies, and pollinators. As the gardens on this tour demonstrate, these landscapes provide a beautiful "sense of place" that is uniquely Californian.

Contact Information For more information, please contact **Kathy@KathyKramerConsulting.net** or call **(510) 236-9558** (landline) between 9:00 AM and 6:00 PM.

Student Cello Recital Fundraiser for MDBA

May 21

Olivia Qian, a junior at San Ramon Valley High School (SRVHS) and founder of the school's bird-watching club, is hosting a solo cello recital fundraiser on **Sunday, May 21, 2026, at 3:00 PM**. The performance will take place at the **SRVHS PAC Center** and will feature masterworks by Bach, Saint-Saëns, Elgar, and Lalo.

All proceeds from the event will be donated to support the conservation programs of the **Mount Diablo Bird Alliance**. In addition to the performance, MDBA members will be on-site to share information about local bird conservation efforts and how you can get involved.

Join us for an afternoon of beautiful music and community spirit in support of birds and their habitats.

Suggested donation: \$7 **online** or bring cash in exact change.

MDBA Trip Report

Mountain View Sanitary District, March 25 & 29

Photos by Isaac Aronow

On Wednesday, March 25, and Sunday, March 29, MDBA, in partnership with the Mountain View Sanitary District (MVSD), conducted a pair of "Introduction to Birding" outings at the MVSD wetlands. We scoped McNabney Marsh for ducks and shorebirds before walking the levees of Moorhen Marsh—the filtering ponds within the MVSD facility that double as prime habitat. Over the two days, we spotted more than 70 species; highlights included a stunning Hooded Oriole, an early-arriving Ash-throated Flycatcher, and an aerial battle between a Sharp-shinned Hawk and a Cooper's Hawk.

Trip report [HERE](#).

North Briones, April 7

Report by: Cheryl Abel

On April 7, a dozen MDBA members and friends met at the Briones Road Staging Area for a hike to Sindicich Lagoons. The day was sunny and pleasant, with a refreshing coolness in the shade. During the approximately three-mile round-trip walk, we spotted 41 species of birds. Highlights included several Western Bluebirds resplendent in their richest spring colors and Lark Sparrows—we observed three pairs carrying nesting material and engaging in courtship.

For several minutes, we listened to the song of a Cassin's Vireo, though the bird remained hidden within the oak woodland. We also heard the distinctive whistle of an early-arriving Ash-throated Flycatcher. As MDBA has begun contributing our field trip checklists to the California Bird Atlas, we were pleased to contribute to citizen science while enjoying a beautiful morning.

Briones is spectacular for wildflowers this time of year, and we enjoyed a vibrant display throughout the walk. Favorite blooms included the Mount Diablo Globe Lily and Owl's Clover.

Checklist [HERE](#).

Mitchell Canyon, April 14

Report by: Sandy Ritchie

Blue-grey Gnatcatcher

Photo by Ron Halsne

On April 14, eleven birders set out for the annual Mitchell Canyon walk. The weather was idyllic: clear and pleasant with only light winds. The "stars" of the day were undoubtedly the Blue-gray Gnatcatchers and Lazuli Buntings. We enjoyed an intimate look at a gnatcatcher sitting on its nest—a structure that closely resembles that of an Anna's Hummingbird—and later observed another pair active at a second nest site.

The calm conditions seemed ideal for raptors; we counted 28 Turkey Vultures soaring overhead, joined by several Red-tailed Hawks. Because this year's trip was scheduled

about a week earlier than usual, the timing likely influenced our species list. While we missed the hoped-for Calliope Hummingbird and certain expected warblers, it was still a productive day. In total, we recorded 42 species seen or heard throughout the walk.

Trip Report [HERE](#).

Black Diamond Mines, April 17

On Friday, April 17, eight hardy birders made the trek to the heights of Black Diamond Mines in Pittsburg. It was a beautiful, clear day, though quite breezy; the wind seemed to put a damper on the bird activity. We were unable to locate any of the elusive Canyon Wrens—one of our primary targets—and encountered very few warblers.

The highlight was a large, active group of Phainopepla. We observed about a half-dozen flitting among the oaks, the highest count we've had here in years. We were also excited to glimpse a falcon overhead, though the sun's glare made it impossible to distinguish between a Peregrine and a Prairie Falcon—both of which are known to frequent the area. Additionally, we enjoyed excellent views of several paired Lark Sparrows.

Checklist [HERE](#).

MDBA Field Trip Announcements

Matt Tarlach, *MDBA Field Trip Chair*

Update from the Field Trips Coordinator

MDBA mounts dozens of Field Trips throughout the year, ranging from easy, accessible strolls around our local parks to longer expeditions to more distant sites, and including some vigorous hikes. On each field trip, one or more leaders guides our group to the best hotspots, in the best season... but the bird-spotting is really a team effort.

Come birding with us!

You can see the field trip checklists we've recorded since transitioning to electronic records [here](#).

To ensure that trips are not overcrowded, pre-registration through Eventbrite is required. MDBA members have priority, with member sign ups opening as soon as the trip is announced in our newsletter. Non-members are welcome too! Registration opens to the public a week before the trip. All registration closes 2 days before the trip, so leaders can know how many to expect. If you won't be able to attend a trip that you've signed up for, please cancel via Eventbrite as early as possible to open that spot up for someone else.

Field trips are ranked according to difficulty:

Trail Rating 1: Easy. Little walking, under 1 mile, on smooth paths.

Trail Rating 2: Moderate. 1 mile or more, possibly some rough terrain.

Trail Rating 3: Challenging. Extensive walking and climbing on rough terrain!

Out of respect for our members and community, we ask participants to take sensible precautions for everyone's health when carpooling and sharing spaces.

We always need new trip leaders! It's fun, and a meaningful contribution to our chapter's mission of education and outreach. Please contact our Field Trip Coordinator, Matt Tarlach, at mdbafieldtrips@gmail.com

If you have a favorite birding spot you'd like to share with your fellow members but would like some help leading the trip, Matt can probably pair you up with an experienced trip leader.

If you're looking for still more bird-related outings in our area, the East Bay Regional Park District holds a variety of events. Go to their Birding page [here](#) and click View Activities.

Lagoon Valley and Pena Adobe

Thursday, April 23, 9 AM - 1:30 PM

Brown Creeper

Photo by Mona Lange

Our excursion begins at Pena Adobe Park, located off I-80 just west of Vacaville. Pena Adobe is a historic site featuring well-established trees, including an orange

tree planted as early as the 1860s. Species frequently seen here include the Brown Creeper, Hermit Thrush, and Black-headed Grosbeak.

After exploring Pena Adobe, we will drive to Lagoon Valley Park. Please note there is a \$5 parking fee; the kiosk accepts either a debit/credit card or exact cash (no change is given). Notable sightings at Lagoon Valley have included the Western Bluebird, Cliff Swallow, Bullock's Oriole, and Western Kingbird. If the lake level is low, we may find Wilson's Snipe and Greater Yellowlegs. Bufflehead and American Wigeon are also common winter residents on the water.

Trail Rating: 1 – Easy. Paths are mostly level.

Leader: Mona Lange, 510-414-2959

Meet At: Pena Adobe Park, located off I-80 between Fairfield and Vacaville.

Directions: Take I-680 to I-80 East toward Sacramento. Take **Exit 51B** (Pena Adobe Road). **Do not** take the Lagoon Valley Road exit. After the stop sign, proceed straight, veering to the **LEFT** onto Pena Adobe Road. We will meet at the restroom building.

Address: 4699 Pena Adobe Road, Vacaville, CA.

This field trip is limited to **12 participants**. All attendees must acknowledge the MDBA Liability Waiver during the registration process.

Register [HERE](#).

Brannan Island & Delta Rookery

Friday, May 1, 8:30 AM - 12:30 PM

Great Blue Heron

Photo by Warren Regelmann

Our outing begins at the entrance to Brannan Island State Recreation Area (SRA), in the parking lot on the east side of Highway 160. Please pay the entrance fee at the station (\$10 general; \$9 for seniors) or via the self-pay envelope if the station is unstaffed. Tip: Most public libraries offer park passes for checkout that provide free day-use parking.

We hope to see Western Kingbirds, Western Bluebirds, Bullock's Orioles, and various raptors. Afterward, we will drive to a nearby rookery where, in previous years, several species of herons, egrets, and cormorants have nested. Picnic tables are available, allowing you to enjoy the activity of the rookery while having a snack. This trip is excellent for beginners!

Hike Rating: 1, Easy. A few walks on level trails adding up to probably less than a mile.

Elevation change: N/A

Leader: Mona Lange, 510-414-2959

Meet: Brannan Island State Recreation Area. GPS: 38.11017164265391, -121.6966400433512

Directions: Central Contra Cost take Hwy 4 towards Antioch. Where the highway forks take Hwy 160 north over the Antioch Bridge (toll). After crossing the bridge,

continue about 7 miles to Brannan Island. The park entrance is on your right, 1/4 mile after crossing 3-Mile Slough. Meet at the parking lot, 200 yards east of Hwy 160.

This field trip is limited to 12 participants.

Register [HERE](#).

West Briones Regional Park

Tuesday, May 5, 8:30 AM - 1 PM

Lazuli Bunting

Photo by Jerry Britten

A springtime visit to the west entrance of Briones Regional Park offers a stunning display of seasonal wildflowers and vibrant birdlife. Lazuli Buntings are often seen here, alongside various flycatchers, vireos, and a diverse array of other spring residents.

The park features a lovely picnic area, so we encourage you to bring a lunch and enjoy the surroundings after our walk. As temperatures can rise quickly in the hills, please ensure you bring an ample supply of water.

Leader: Cheryl Abel

Rating: Category 2--moderate hiking over dirt and gravel trails with mild slopes.

Elevation change: 200 feet

Meet: Bear Creek Staging Area parking lot

Directions: From SR 24 in Orinda, drive north on Camino Pablo about 2.25 miles, turn right on Bear Creek Road, continue for 4.5 miles to park entrance. Drive to farthest parking lot on the right.

The field trip is limited to 15 participants. Participants must acknowledge the MDBA Liability Waiver during the registration process.

Register [HERE](#).

Eastern Contra Costa County

Thursday, May 7, 8 AM - 1 PM

Western Kingbird

Our plan is to meet at the Big Break Regional Shoreline/Delta Science Center. After birding the shoreline, we will drive to the Marsh Creek Trail and, if time permits, continue to Bethel Island. These locations are typically excellent for observing waterfowl, raptors, and several passerine species that are not easily found elsewhere in the county.

As temperatures can rise significantly in East County, it may become quite hot by midday; please plan accordingly with sun protection and plenty of water.

Hike Rating: 1-Easy

Elevation change: N/A

Leaders: Randy Huey, 925-518-8439

Meet: Big Break parking lot in Oakley at 8 AM

Directions: Take Highway 4 east toward Stockton/Pittsburg, after Antioch take right Exit 30 toward CA-160/Sacramento/Rio Vista. Take Exit 1A, East 18th/Main Street, turn right at the bottom of the exit onto Main Street, proceed east a little over 1 mile, then turn left onto Big Break Road. Turn into Big Break Regional Shoreline/Delta Science Center just past the last houses on the right.

This field trip is limited to 20 participants.

Register [HERE](#).

Pine Canyon

Monday, May 11, 8 AM - 1 PM

Townsend's Warbler

Photo by Jerry Britten

Pine Canyon, which encompasses the Castle Rock (EBRPD) recreation area and Diablo Foothills Regional Park, provides rich habitat for spring migrants and returning summer residents. Warbling Vireos and their cousins, Cassin's Vireos, both nest within the canyon. We also hope to find orioles, flycatchers, wrens, and various warblers—and if we're lucky, a Lazuli Bunting or a Peregrine Falcon.

Please bring water, snacks, and a lunch if you would like to enjoy the shady picnic tables in the park after our trek.

Trail Rating: 2–3. Out-and-back along a wide dirt trail, with some short climbs. We'll need to cross little Pine Creek several times - without bridges. These crossings are not deep but can be muddy or a bit adventuresome, depending on recent rains.

Elevation Change: 200 feet, in a very gradual climb

Leader: Ted Robertson, 925-899-1872

Directions: From Ygnacio Valley Road, drive south on either Walnut Avenue or Oak Grove Road to the traffic circle. Continue south on Castle Rock Road, pass Northgate High School, then drive to the end of the road.

This field trip is limited to 18 participants.

Register [HERE](#).

Shadow Cliffs Rookeries

Friday, May 15, 8:30 AM - 12 Noon

Great Blue Heron

Photo by Warren Regelmann

Every year, Herons and Cormorants nest in the tall trees within the park's riparian area. We will visit these rookeries, hopefully catching glimpses of chicks within the nests. The park also hosts several Wood Duck nest boxes; with luck, we may spot ducklings and other young waterfowl as well.

Shadow Cliffs, located in Pleasanton, can get quite hot this time of year. Please dress appropriately (a broad-brimmed hat is highly recommended) and bring sunscreen and plenty of water. There is a restroom located near the trailhead.

Please factor in the potential for traffic when planning your departure.

- Parking Fee: \$6 per vehicle.

Trail Rating: 2 - One hill to get onto the levee trail and just over a mile of walking with few places to sit.

Leader: Elisa Fernandes-McDade (elisa.fernandesmcdade@gmail.com)

Meet: Small shade structure near Levee Trail trailhead and next to the shaded/solar panel parking lot

GPS: 37.9277763, -122.0644239. Shadow Cliffs Regional Park, 2500 Stanley Blvd, Pleasanton, CA 94566 USA

Directions: From Walnut Creek, take I-680 South. In Dublin, take Exit 30 to merge onto I-580 East toward Stockton. Stay on the I-580 for about 3 miles, then take Exit 47 for Santa Rita Rd toward Tassajara Rd. After about 1.5 miles, take a left onto Valley Ave. After about 1 mile, take another left onto Stanley Blvd. Continue for 1 mile, then turn right into the Shadow Cliffs entrance.

There will be a large, brown sign with white lettering. After paying at the entry kiosk and going through the roundabout, turn right into the parking lot with solar panels near the base of the hills.

This trip is limited to 20 participants. Carpooling is encouraged!

Register [HERE](#).

Point Reyes

Saturday, May 30, 8:30 AM - 3 PM

Prairie Warbler

Point Reyes is one of the premier birding locations in Northern California and a renowned spot for finding rarities during migration—such as the Prairie Warbler pictured above (image by Beth Branthaver). MDBA visits at least twice a year; on our spring trip, we hope to observe northbound migrants as well as resident birds in their finest breeding plumage.

The exact itinerary will depend on the weather, but after checking Drakes Beach and the lagoon behind it, we will likely visit the Lighthouse area and the "fish docks." After lunch, we may walk down the Avenue of Cypresses to the historic RCA building.

Please bring water and lunch, as this area is remote. The weather at the Point is highly changeable; bring warmer clothing than you think you'll need—ensuring you include a windproof layer—as well as sun protection.

Trail Rating: 2 -- up to a mile total walk, almost entirely on paved roads but with some moderate grade.

Elevation Change: 100 ft

Leader: Matt Tarlach, mdbafieldtrips@gmail.com

Meet: Kenneth C. Patrick Visitor Center, Drake's Beach

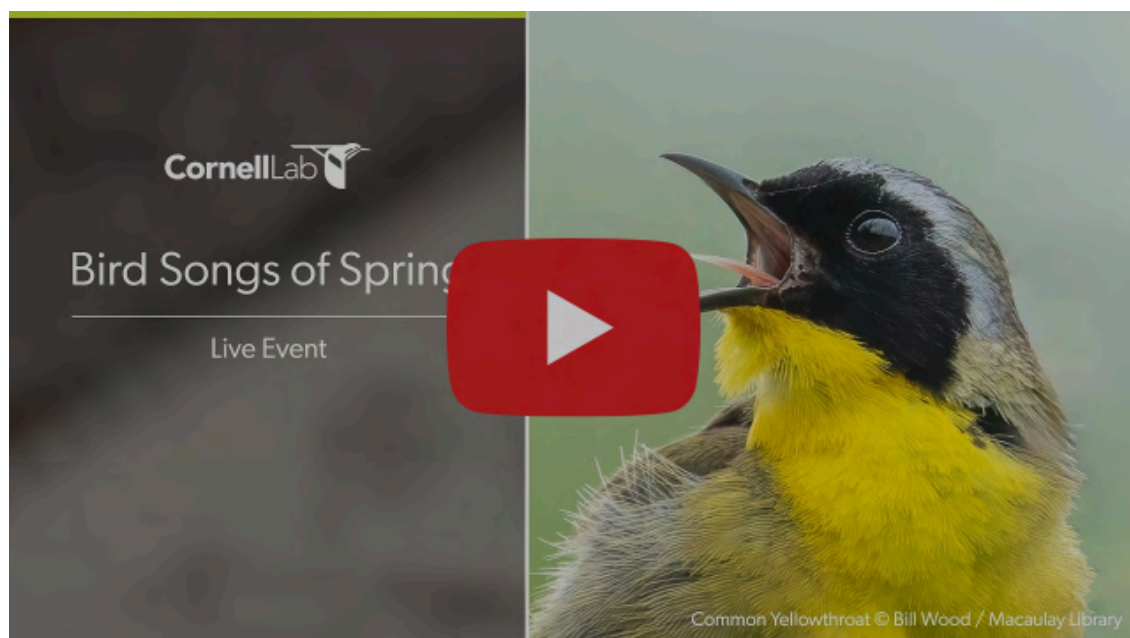

GPS: 38.027828257127936, -122.96201741318059

Directions: Depending on your starting point, take the best route to San Rafael and go North on US 101. From 101, take Lucas Valley Road to Nicasio. At the reservoir, turn left. Follow signs to Point Reyes Station, and when you get to town turn left onto US-1. After passing through town (the Bovine Bakery is a tasty stop for breakfast pastries), turn right from US-1 onto Sir Francis Drake Blvd and follow it for 15 miles to Drakes Beach Road.

Due to limited parking, this trip is limited to 12 participants. Carpooling is encouraged!
